

No.	Risk	Description	Root Cause	Likelihood	Preventions
1	Scope creep	Using more resources to accommodate the new functionality	Not having a concrete plan and adding new things at the last minute. Not defining the project scope clearly	Highly likely	Project planning, Continuous review of the plan
2	Communication Issues	Team members doing the wrong tasks or more than one member doing the same task. Team members misunderstanding the tasks they are given	Working on the project without a clear idea of your assigned role. Not having a well-defined team roles	Likely	Meetings, written agreements of meeting points, clear project roles and plan
3	Schedule Risk	When there is a chance of not meeting the planned project schedule.	Neglecting/procrastinating work or having an unrealistic project schedule	Somewhat Likely	Carefully considering our project schedule with realistic timings. Having a clear plan with when to get certain tasks completed and important milestones
4	Updating Database Design	Changes in plans may result in the structures of databases that are already filled with data needing to be changed	Not properly planning out database design before starting implementation	Highly likely	<p>Double-checking our database design plan and thinking about implementation while designing it.</p> <p>If we end up in a situation where we have to change it, have a file of code for dropping and creating the database and a file</p>

					to insert mock data
5	Custom Coding	Highly specific features taking a large amount of time to custom code it to be just right	Being too ambitious with very specific plans for features	Likely	Compromising on some ideas so that we have the base functionality of the web app working
6	Underestimation Of Time Commitment	Underestimating how long it will take to make the implementation side of the project	Trivialising how much there is to get done with the implementation and assuming we will run into no setbacks	Likely	Starting implementation early alongside the report so that we have enough time to meet all of the requirements
7	Responsive Website
